Private Sector Development in Contexts of Open and Sustained Violence - Yemen

Copenhagen
7th November 2016

Seminar on Private Sector Development in Conflict and Fragility Affected Environments

Birgit Seibel, GIZ
Table of Content

1. PSD Programme in Yemen pre-war
2. 2015: War breaks out in Yemen
3. PSD in contexts of war - Change of PSD Programme Concept
4. Interaction between peace, fragility and PSD - Frameworks
5. What’s the case for PSD in contexts of open & sustained conflict?
6. Contexts of open and sustained conflict and PSD – practical examples
   - Solar sector
   - Wheat and maize
   - WhatsApp BDS – health sector and women
   - Business continuity training
7. Challenges and success factors
PSD Programme Yemen pre-war

Typical PSD programme working mainly on macro and meso level:

- Business Environment Reform (BER)
- Public Private Dialogue (PPD)
- Support to build capacity of chambers, sector associations
- BDS promotion
- Value Chain development
March 2015: War breaks out

Civil war, div. conflict lines, int. Actors, IS, AQAP

Destruction of civil infrastructure

2.7 Mio IDP, refugees & migrants

13 Mio. depend on hum. Aid

Import and Export barriers

Public services stopped

Comp. had to fire 50% of employees

1 job keeps > 8 people alive

Picture: Yemen Society SOAS

PSD in times of war - Change of PSD Programme Concept in Yemen

- **Freeze**
  - Evacuate staff
  - Contact national staff

- **Help**
  - Start rapid response
  - Cash for work

- **Build resilience**
  - Try and learn, small pilots
  - Business continuity

- **Re-Focus**
  - Draw conclusions from pilots, adopt approach, Re-focus
  - Solar, drip irrigation, Health sector

- **Conceptionalize**
  - War longer as expected; change of concept; remote management
  - Remote management, intermediaries, M&E

14 months
Multiple channels of interaction between peace, fragility and PSD

• New thinking on peace, fragility and PSD - WDR 2011, OECD Fragile State Principles, New Deal:
  – PSD is a critical component of state- and peacebuilding
  – PSD is to be promoted as early as possible
  – Success of any intervention depends on the degree to which it takes account of peace- and state-building needs.

• The New Deal defines the major peace- and state-building goals to guide any intervention in fragile and conflict situations incl. PSD.
Multiple channels of interaction between peace, fragility and PSD - Frameworks

<table>
<thead>
<tr>
<th>New Deal’s five Peace- and Statebuilding Goals (PSGs)</th>
<th>DCED</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Legitimate Politics: foster inclusive political settlements and conflict resolution</td>
<td>Fostering Good Governance</td>
</tr>
<tr>
<td>2. Security: establish and strengthen people’s security</td>
<td>Building security, stability, and trust</td>
</tr>
<tr>
<td>3. Justice: address injustices and increase people’s access to justice</td>
<td>Economic Development</td>
</tr>
<tr>
<td>4. Economic foundations: generate employment and improve livelihoods</td>
<td>Creating infrastructure of a modern society</td>
</tr>
<tr>
<td>5. Revenues &amp; Services: manage revenue and build capacity for accountable and fair service delivery</td>
<td></td>
</tr>

What’s the case for PSD in contexts of open and sustained violence?

- There is always a local private sector, even in contexts of war
- Local businesses are actors – in a context of sustained conflict
  
  - Local businesses have a choice: (a) adapt to the conflict situation and contribute to an economy of war or (b) provide livelihoods and support ending the conflict to go back to normal
  - Local businesses are labor intensive, maintain local business linkages; are likely to have sub-national urban centers as their base, invest and expand locally; provide a stimulus for local development
  - Support re-stabilizing contexts of open and sustained violence through economic and non-economic impacts
  - Prepare the ground for a more successful post-conflict reconstruction
Contexts of Open and Sustained Violence and PSD – challenges and possible solutions

- Eroded security
- Instability
- Trade is dangerous
- No legitimate government
- No economic framework
- Volatile, informal markets
- Destroyed factories, markets, roads
- Transport of goods difficult, high security costs
- Uncertainty
- No intern. + local investments
- Mistrust, Brain drain

- Business continuity to keep jobs, income, livelihood
- Engage private sector and associations in activities that keep peace: network events, dialogue, training
- Sectoral focus on (i) “opportunities” of war (solar) and (ii) services (health) vital for society
- Work with “business 4 peace entrepreneurs”
- Keep and re-build BDS services adopting to contexts of war
- Include marginalized groups (women)

DCED

- Fostering good economic governance
- Re-connect trust, prepare stability
- Sustain jobs/income, livelihood
- Keep soft infrastructure

partly
Example 1: Strengthening the Solar Sector in Yemen

- Power supply collapsed
- Fuel price of 2 USD/liter
- Generators not affordable
- Economic & ecological potential of solar sector also beyond war

- Sector network of 85 companies established. Aim: Enhance the functionality of the sector. Bring together conflicting ethnic groups Houthi and Islah. Establish B2B meetings to build trust
- Joint implementation plan - items implemented: national solar fair with 70,000 visitors, awareness raising campaigns
- Skills Development of 472 young men (strict selection criteria) trained in the installation of Solar Systems. 80% of graduates found work; Technicians trained on technical level.
Example 2: Wheat and maize with drip irrigation

- Provision and installation of drip irrigation systems in nine demo plots / 9 lead farmers selected (strict criteria, “peace” reputation), they also take financial risk
- Skills development: 450 targeted farmers - Houthi and Islah – trained on improved seeds, fertilizers, and plant protection. Production increase 67%, water decrease up to 70%
- Houthi and Islah Farmers started cooperating to jointly sell wheat crops to the Economic Authority of Yemen; Qat production dropped in the implementation area of the intervention - wheat and maize presently promise a higher return on investment
Example 3: Health sector – WhatsApp BDS

- Yemenis usually traveled to Jordan for treatment and midwife services or used public service
- Both not possible due to war
- Economic potential also beyond war

- Provision of BDS to women - Women Business Owners Training (by ILO) including business plan development; strict selection criteria
- BDS through WhatsApp groups, peer to peer and coaching –300 women also in rural areas from Houthi and Islah groups: midwifes, dentists, shop owners, traders of herbs
- 80 midwifes trained: continued business, hired additional 120 women, income increase; WhatsApp groups across conflicting groups and regions, hugely popular for commercial and private dialogue
Example 4: Business continuity training

- SMEPS is a registered NGO providing BDS
- Main implementing partner
- Good reputation, promoter of peace
- Well known in all regions across conflict lines

- Business continuity training requested by SMEs to continue with production / services despite war
- BDS service not known: Business continuity training developed by international advisor; ToT through skype; SMEPs trains consultants to deliver training;
- Currently implemented, no results yet
Challenges and success factors

- Keep clear of Business Environment Reform level / macro level
- Focus on micro (firm) and meso (intermediary) level
- Reap economic potentials created through war (solar, health)
- Focus on „keeping jobs, keeping income opportunities“
- Focus on PSD contribution to peace and stability: „keeping dialogue, building trust, working across conflict lines“
- Work with trusted local implementing PSD partners and local businesses / farmers / business women with a „peace“ record
- Use Do-No-Harm, monitor positive and negative results
- Apply risk management
- M&E necessary by external local institution
